Driving Parleys Summit

When it closes

Parleys Canyon funnels every Salt Lake-to-Park City driver up a steep grade into Wasatch snow, and UDOT runs chain and traction restrictions here through the winter. Heavy snow and blowing snow in the canyon can slow it to a crawl or close it, and truck restrictions are common when the grade turns icy. Check the cameras before you head up.

Are chains or snow tires required on Parleys Summit?

UDOT sets traction and chain restrictions in Parleys Canyon through the winter, and they change with each storm.

How high is Parleys Summit?

About 7,020 feet on I-80 in the Wasatch Range, high enough that the summit can be in a snowstorm while Salt Lake City stays dry.

Where is Parleys Summit?

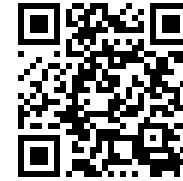

On I-80 just east of Salt Lake City, at the top of Parleys Canyon toward Park City. Track your mile marker up the canyon with the MileCheck app.

Where are the plows?

The live page shows each one as an arrow pointing the way it is heading. Parked trucks are listed too.

Notes

Live conditions

milecheckapp.com/passes/parleys/

Cameras, closures and road reports from UDOT. This sheet was built September 29, 2026. Check the live page before you leave.

Snow and avalanche

Snow depth for this road is measured at the Parleys Summit SNOTEL station, 7,590 ft, less than a mile from the summit. The avalanche forecast comes from UAC. Both are on the live page.

In the car

MileCheck shows your mile marker, the nearest camera and the alerts ahead, on CarPlay and Android Auto. The mile marker works without a signal.

About this map

The numbered stops are a selection from OpenStreetMap along the roads this sheet is about. This map does not show every stop. Gates and seasonal closures are not drawn.
